How do I print a poster?

There are two poster-size printers in the building, one of which is in PIRL.

To use the PIRL printer, begin by reading the User Notes for the printer:

Poster Printing

To print to these printers, you **must** have a PIRL user account. Please fill out the online account application form: **New User Application Form**. It may take up to one working day to get your account set up.

The easiest way to proceed is to begin with a PDF file and generate a raster image.

42" is the maximum width. Render @300dpi.
