How do I configure my LPL email client?

When you begin using Thunderbird, Mac Mail, or Outlook, you will see a series of setup screens.

**Thunderbird**

The first time you start Thunderbird, it will present a pop-up asking "Would you like a new email address?".

Click "Skip this and use my existing email".

You'll see a new pop-up.

Type your full name in the "Your name" field.

Type your LPL email address in the "Email address" field.

Type your LPL password in the "Password" field.

Uncheck the "Remember password" box if desired.

Click Continue.

Click the Manual Config button in the next window

and enter the values given on the following pages:

Click **here** to configure your email client to use IMAP with SSL to read mail.

Click **here** to configure your email client to use TLS to send mail.

**Mac Mail**

If you are creating an account on Mac Mail for the first time,

it will try to configure your incoming and outgoing settings automatically.

Its guesses will be wrong, so click "Manual Config" and enter the values given
on the following pages:

Click **here** to configure your email client to use IMAP with SSL to read mail.

Click **here** to configure your email client to use TLS to send mail.

**Outlook and Other Clients**

Click **here** to configure your email client to use IMAP with SSL to read mail.

Click **here** to configure your email client to use TLS to send mail.
