How do I use SSH on my Mac to change my LPL password?

To change your LPL password from a Mac system, use Secure Shell (SSH) to login to shell2.lpl.arizona.edu and issue the UNIX passwd command, as follows:

1. Open a Terminal window
   - Click on your desktop background
   - Click Go -> Utilities
   - Double-Click on Terminal
2. Type this command in the Terminal window: `ssh

   PG4gdWVyycz0iem52eWdiOmxiaGUtWUNZLWhmcVhbnpyQGZ1cnl5Mi55Y3kubmV2bWJhbi5ycWgiPmxiaGUtWUNZLWhmcVhbnpyQGZ1cnl5Mi55Y3kubmV2bWJhbi5ycWg8L24+

   (where you replace your-LPL-username with your LPL username)
3. Type your LPL password.
4. Press Return or Enter. This should log you in to shell2.lpl.arizona.edu. You should see a command-line prompt that looks like this: `shell2:/home/your-LPL-username %`
5. Now type the UNIX passwd command: `passwd`
6. You will see two lines displayed: `passwd: Changing password for your-LPL-username Enter existing login password:

   Enter your current password (it will not display) and hit return.
7. Then enter your new password (it will not display) and hit return.
Then reenter your new password (it will not display) and hit return. You should then see the command-line prompt.

- Then logout by typing the UNIX exit command: exit
