Evolution of Planetary Surfaces

Instructor: Shane Byrne
524 Kuiper Space Sciences, (520) 626-0407, shane@lpl.arizona.edu

Times and locations:
- Two lectures per week on Tuesday and Thursday from 11 to 12:15am.
- First lecture on Tuesday, August 22nd.
- Lectures will be held in room 312 of the Kuiper Space Sciences building.

I'll be available for questions and discussion, after lectures on Tuesdays and Thursdays. If you need help and cannot make these times then please email me to make another arrangement. I have a general open door policy so you can stop by anytime, but I’m not always available.

Course Website:
Lectures, homework assignments and general information on the course will be posted on a class website at:

http://www.lpl.arizona.edu/~shane/PTYS_554

Scope of Course:
Planetary surfaces sit at the interface between the planet’s atmosphere and interior and are also often exposed to exogenic processes like impacts and space-weathering. This makes them very complex to understand, but also rich historical archives that record changing conditions on that planet over the course of solar system history.

In this class, we will explore how a variety of geologic processes, such as impact cratering, volcanism, tectonics, fluvial and atmospheric, shape planetary landscapes.

This course is intended for beginning graduate students with little previous exposure to geosciences. There are no course prerequisites and anyone may enroll (undergraduates must be seniors to enroll for credit).

Semester Specific Info:
- Our class fieldtrip will be TBD to the Flagstaff area.
Course credit (i.e. the part that is important to read…):
There will be no final or mid-term exam in this course, students get credit for
homeworks, a fieldtrip, and a final course project.
  • Homework will be assigned every two weeks in class. In general, this
    homework will be due two weeks from the date on which it is assigned. Some
    of these assignments may be based on analysis of spacecraft data. Late
    homework receives half credit and homework submitted a week or more after
    the due date receives no credit. If you are unable to complete a homework
    assignment on time (and have a good reason) you must come talk to me
    before the due date to avoid losing credit.
  • There is a field-trip during this class which will be a few days long and involve
    camping and moderate hiking, see the PTYS594 class website for details and
    examples of past trips https://pirlwww.lpl.arizona.edu/wiki/Fieldtrip.
  • A final course project will be required of all students on some subject relevant
    to the content of the course. Students are encouraged to interact with me
    early in the semester to choose a topic for their project. A ~10-15 minute oral
    presentation to the class (during finals week) and written report on this project
    will be due at the end of the semester. In lieu of a mid-term, there will be an
    LPSC-style abstract on your project due in the middle of the semester.

    Doing something connected to your ongoing research is a good strategy,
    but if you do this then the work you do for your class project should be clearly-
    defined i.e. some self-contained aspect of your research rather than a direct
    continuation of what you were doing anyway.

    This project is the bulk of the grade so you should expect to put some serious
    work into it

Grades are assigned according to the following scale. I don’t rescale grades to ensure that any
particular statistical distribution is met.

90-100%  A
75-89%   B
60-74%   C
50-59%   D
0-49%    E

General Policies:
You are encouraged to discuss approaches to solving homework problems
and your class projects with each other; however, all work submitted must be the
your own. Previously completed class projects may not be submitted for credit in
this course.

Since this is a graduate-only class there’s no lecture attendance policy – you
can do what you chose in that regard. You have the responsibility for learning all
the material.
Accessibility and Accommodations:
At the University of Arizona we strive to make learning experiences as accessible as possible. If you anticipate or experience physical or academic barriers based on disability or pregnancy, you are welcome to let me know so that we can discuss options. You are also encouraged to contact Disability Resources (520-621-3268) to explore reasonable accommodation.

If our class meets at a campus location: Please be aware that the accessible table and chairs in this room should remain available for students who find that standard classroom seating is not usable.

Classroom Behavior Policy
To foster a positive learning environment, students and instructors have a shared responsibility. We want a safe, welcoming, and inclusive environment where all of us feel comfortable with each other and where we can challenge ourselves to succeed. To that end, our focus is on the tasks at hand and not on extraneous activities (e.g., texting, chatting, reading a newspaper, making phone calls, web surfing, etc.).

Threatening Behavior Policy
The UA Threatening Behavior by Students Policy prohibits threats of physical harm to any member of the University community, including to oneself. See http://policy.arizona.edu/education-and-student-affairs/threatening-behavior-students.

Code of Academic Integrity
Students are encouraged to share intellectual views and discuss freely the principles and applications of course materials. However, graded work/exercises must be the product of independent effort unless otherwise instructed. Students are expected to adhere to the UA Code of Academic Integrity as described in the UA General Catalog. See: http://deanofstudents.arizona.edu/academic-integrity/students/academic-integrity.

UA Nondiscrimination and Anti-harassment Policy
The University is committed to creating and maintaining an environment free of discrimination; see http://policy.arizona.edu/human-resources/nondiscrimination-and-anti-harassment-policy

Subject to Change Statement
Information contained in the course syllabus, other than the grade and absence policy, may be subject to change with advance notice, as deemed appropriate by the instructor.
**Topics and Timetable:**
Expect adjustments throughout the course.
