What Now?!?

Two rare projection problems in Kuiper Space Sciences Lecture Hall Room 308

1. Projection system will “lock” and not respond to commands; screen will be black. To correct the problem:
   - use the remote control to power off
   - wait 5 to 15 seconds
   - use the remote control to power the system on.

2. Video projector and switcher lose sync; loss of channel information, inability to access source, configuration settings are missing. To correct the problem:
   - disconnect DATA In and DATA OUT cables
   - use remote control to power off
   - wait 5 to 15 seconds
   - reconnect DATA IN and DATA OUT cables
   - use remote control to power the system on.
