

## **In-class presentation:**

### **Schedule:**

Monday, April 13: X. Chen (first), W. Gorman (second)

Wednesday, April 15: J. Walters (first), N. Shankarapa (second), L. Conway (third)

Monday, April 20: J. Li (first), Y. Cai (second), A. King (third)

Wednesday, April 22: K. Satapathy (first), A. Higgins (second), T. Trent (third)

### **Details:**

Present a topic that interests you, either from a chapter in a textbook, or an actual journal article presentation, or even your own research.

The presentation itself should not exceed 20 minutes. There will be 5 minutes for questions/comments before moving on to the next presentation.

I will email you with feedback on your presentation, and including the grade.

You will be graded mostly on your perceived level of effort in preparing this presentation, and an assessment of how well you understand the material you presented. The purpose of the exam is to get you to better understand a topic that was not covered in class, and one way to achieve this is for you to present it to the class.

Please fill out the Google sheet to select a day for your presentation (see the email I sent to everyone)
